

ARCHDAILY

# BUILDING OF THE YEAR

AWARDS 2012

brought to you by  HP Designjet Solutions

ArchDaily [www.archdaily.com](http://www.archdaily.com) is currently the most visited Architecture website in the world. With more than **6,000,000** visits and more than **60,000,000** pageviews a month, it is recognized as the ultimate source of inspiration for thousands of architects [www.fastcompany.com/1765064/chilean-entrepreneurs-redesign-the-architecture-industry](http://www.fastcompany.com/1765064/chilean-entrepreneurs-redesign-the-architecture-industry), a community of global professionals that once again has acted as the jury for the Building of the Year Awards. It was the collective intelligence formed by our own readers that chose, out of nearly **3,000** projects, the best architecture worldwide.

Last month, ArchDaily partnered with HP to launch these unique awards for the architecture community. On February 14th, after more than **70,000** votes from all over the world, the winners for ArchDaily's Building of the Year Awards 2012 were announced.

It has been 4 exciting weeks where readers chose their favorite building. Divided into 14 categories, this year's winners vary from emerging young architects like MVN Arquitectos or Luís Rebelo de Andrade & Diogo Aguiar to the most prestigious offices of MAD Architects and OMA. The project range from an artistic church made only of steel in Belgium or a low-cost Training Centre that improves social conditions of workers in Indonesia to the Velodrome for the London 2012 Olympics, or a 30,000 sqm urban space in Denmark, every project noted for their unique and innovative designs.

You can see all the winners here: <http://www.archdaily.com/building-of-the-year/2012/>

## About ArchDaily

ArchDaily (<http://www.archdaily.com>) was founded in March 2008 with the one mission of delivering the most complete information to architects around the world; every week, every day, every hour, every moment: as soon as it is happening. It is the online source of continuous information for a growing community of thousands of architects searching for the latest architectural news: projects, events, interviews and competitions among others.

The editorial staff works in a daily basis with the most prestigious and influential architectural practices around the world in order to deliver specific and valuable content to the international architecture community. In one year ArchDaily has quickly established itself as one of the leading architectural websites in the world due to their editorial staff's meticulous understanding of what the audience is really looking for: the best architecture around the world, as soon as possible.
