

LIQUID SPACES

Scenography, Installations and
Spatial Experiences

gestalten

HUB Flat | Churtichaga + Quadra-Salcedo →

Channeling the experiential artwork of Gordon Matta Clark, this co-working office transforms a 1950s apartment into an expressive and interrelated network of spaces for impromptu collaboration. The intriguing optical and spatial illusion engages a process of geometric subtraction. Interpenetrating oval and circular shapes are strategically removed from walls to link previously separate rooms. These compelling openings confuse understandings of depth perception, as the cut-outs shift from 2D to 3D when one moves around them. ■

LIQUID SPACES

Scenography, Installations and
Spatial Experiences

Liquid Spaces features a wide spectrum of unconventional environments ranging from experimental installations to complex productions. Breaking the boundaries of classic spatial limitations and defying traditional expectations, these environments reinvent the three-dimensional setting by playing with light, texture, sound, and proportions. The foundation of a meaningful relationship between artist and audience, museum and visitor, or brand and customer is based on an unforgettable experience. Yet these groups of people are more discerning than ever before: They want a personalized moment, to be informed and entertained, and above all, to be inspired. Artists, scenographers, and architects, as well as interior and exhibition designers, create these extraordinary situations. *Liquid Spaces* presents the most innovative concepts, most radical designers, and most demanding clients. ■
